DISS NY

ADVANCED DENTAL IMPLANT EDUCATION • AFFORDABLE CARE • BETTER SMILES

Affordable Dental Implant Treatment Through Education

Helping patients smile again while educating the next generation of implant dentists.

DISS NY is an educational dental implant program designed to train licensed dentists in the surgical placement of dental implants under the direct supervision of experienced DISS faculty. Through this unique hands-on training program, patients have the opportunity to receive dental implant surgery at a significantly reduced cost while helping dentists advance their surgical skills.

1. How to Become a Candidate

Patients interested in participating must first contact our office and schedule an initial consultation. During this visit, we will perform a thorough evaluation of your dental condition and review your medical and dental history. A CT scan must also be taken at our office so the DISS faculty can evaluate your bone structure and determine whether you are a suitable candidate.

2. Treatment Costs

UNDER $600

Per dental implant — surgical placement only

The fee covers surgical placement of the implant only. It does not include additional procedures that may be necessary, such as tooth extractions, bone grafting, or other required surgical procedures. After your evaluation, we will present your proposed treatment plan and all associated fees. If you agree to proceed, payment must be made in full at the time of consultation to secure your place on the patient list.

3. How Course Scheduling Works

DISS NY courses take place several times throughout the year. There are no predetermined course dates; courses are organized based on participant registration and training needs. Our patient scheduling system operates on a **first-come, first-served basis**. Once we have enrolled enough eligible implant cases to organize a course, qualified patients are placed on the patient roster and contacted with the upcoming surgical date.

Joining the patient list does not guarantee an immediate appointment. Scheduling depends on course enrollment and the availability of appropriate cases.

4. Follow-Up Care and Final Restorations

Following implant surgery, necessary follow-up visits will take place with our DISS faculty at the same office where the course was conducted. Once your implants have healed and you are ready for your final teeth (the restorative portion of treatment), you have two options:

• Continue your restorative treatment at our office.
• Return to your own dentist with the necessary clinical information provided by DISS so your dentist can complete the restorative work.

5. What Happens if an Implant Fails?

Although dental implants have a high success rate, implant failure is a possibility with any implant procedure. Should an implant fail, DISS will assess the situation and work with you on an appropriate solution. Depending on the circumstances, this may involve replacing the implant during a future course or having one of our DISS faculty members personally address the situation.

Our goal is to provide appropriate follow-up care and address complications should they arise.

READY TO GET STARTED?

If you are interested in becoming a patient with DISS NY, contact our office today. Cindy Lodato will be happy to answer your questions, explain the process, and help schedule your initial consultation to determine whether you may qualify for the program.
